

Mavlonbek Sultonbekov

DATA ANALYST

London, UK | +44 7881 196552 | mavlondata@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL PROFILE

Data Analyst with practical experience using SQL, Python and Power BI to clean, model and analyse commercial data. Developed KPI-driven analytics projects focused on sales, profitability and inventory performance. Uses AI-assisted workflows to accelerate analysis, validate outputs and translate complex data into clear, actionable business insights.

CORE SKILLS

Core Tools: SQL | Python | pandas | Power BI | DAX | Excel | Microsoft Fabric | Data Modelling

Applied AI: Claude Code | OpenAI Codex | AI-assisted analysis | MCP | Agentic workflows | Prompt design | AI Fluency and output validation

RELEVANT EXPERIENCE

Data Engineering Intern — Itransition Group, Remote

March 2026 – May 2026

- Cleaned and transformed structured datasets using Python and pandas, producing analysis-ready data for SQL reporting workflows.
- Developed validation checks to identify missing values, inconsistent formats and duplicate records before downstream analysis.
- Wrote SQL queries using joins, aggregations and filtering to prepare reporting datasets and investigate data-quality issues.

Tools: Python, pandas, PostgreSQL, SQL, data cleaning, data validation

SELECTED PROJECTS

Carvon AI — AI-Powered Marketplace Analytics Platform · In Development [\[project\]](#)

- Designing a unified analytics platform for sellers across Uzum, Kaspi, Wildberries and Ozon, consolidating sales, fees, returns, advertising and inventory data.
- Defined KPIs for net revenue, gross profit, profit margin, return rate, stock cover, sell-through rate and marketplace performance.
- Prototyping an AI Business Analyst to answer natural-language questions using seller-specific sales, profitability, returns and inventory metrics.
- Designing AI-assisted analysis for sales changes, margin leakage, unusual returns and reordering decisions, with validation and KPI-governance rules to ground outputs.

Methods: SQL, Python, pandas, data modelling, KPI design, data validation, Power BI, AI-assisted analytics, prompt design, AI output evaluation

Urban Mobility Demand Analytics — Microsoft Fabric · Completed [\[project\]](#)

- Analysed January 2024 NYC taxi and weather data to help transport teams understand peak demand, high-value zones and changes in passenger behaviour.
- Ingested, cleaned and validated trip records through Bronze, Silver and Gold layers, standardising dates, locations, fares and distances for analysis.
- Modelled trip demand, fare revenue, distance and geographic performance for Power BI reporting on peak periods and high-demand locations.

Tools: Microsoft Fabric, Lakehouse, Warehouse, PySpark, SQL, Power BI, data modelling, data validation

Car Sales Performance Dashboard — Power BI · Completed [\[project\]](#)

- Built Power BI measures and KPI cards to track YTD and MTD sales, average selling price and growth against previous periods.
- Analysed weekly, dealer-region and vehicle-level performance using interactive filters and comparison visuals to reveal sales trends and changes in transaction value.

Tools: Power BI, DAX, data modelling, KPI design, data visualization

EDUCATION

BSc (Hons) Software Engineering

2024 – 2027

Anglia Ruskin University, Cambridge | Relevant study: Databases, Machine Learning, Algorithms and Data Structures

CERTIFICATION

Certificate in Data Analytics — MAAB Innovation LLC

SQL, Python, Power BI, data cleaning, transformation and dashboard development (Credential ID: 000266).

Claude and Anthropic AI Professional Development

Completed learning in AI Fluency, Claude Agents, Agent Skills and Cowork workflows.
